ENCLOSURES: Overlay on reduction of map referenced above

REMARKS: Subsequent to the publication of the referenced Photo Intelligence Memorandum, further study of the photographic prints has revealed three additional SAM launching sites and the Yo-Yo of a fourth site.

Sites 2 and 48* were imaged at the edge of one oblique print, when the vehicle tilted from normal flight attitude. Sites 40 and 55 are in an area of heavy cloud cover, and are not readily discernible. Site 9 appears on the extreme oblique, and only the Yo-Yo is visible.

A total of twenty-three Moscow SAM sites have been at least partially covered by photography, and 18 of them are imaged on TALENT mission

* All site numbers used in this document refer to the numbering system initiated by CIA/RR/D/GP in 1955. All inner ring sites bear even numbers, outer ring sites odd numbers. Numbering starts with the site most nearly due south of Moscow, and proceeds around the rings in a clockwise direction.
